- Methodologies: Scrum / Agile
- Patterns: OOP, SOLID, React Patterns

LANGUAGES

- English: Intermediate
- Ukrainian: native language

EXPERIENCE

I'm learning programming over two years during this time I had experience with frontend and backend developing. Almost I work with Frontend, namely React(Redux). I have several not bad project written on React(Redux), which u can see on my git.

At the university, I completed a course in the discipline "OOP" (the language of study is C++).

I had experience in working in team, when I was working on a project with 3 colleagues from university. For working in team we used Jira and GitHub. I was chosen on team-leader role, so I settled and controlled tasks and points for my team.

My last pet-project that was making copy of real site using React.ts + Redux. I am making UI with adaptive layout and providing functionality for that site. U can see this on <https://github.com/YuraSab/staff-test-project>.

I had commercial experience in one Lviv company. There I was working in team, creating increment to sites and mobile apps and communicated with client.

WHAT I AM LOOKING FOR

I am looking for full-time front-end position, where i can apply my skills and knowledge, and improve them as well.

MY GIT
